

## Internship in the R&D of an audio enthusiastic tech startup

### Open Position

#### Are you looking for a very special challenge?

Are you looking for an internship to advance your skills in development? Would you like to get insights into the professional audio market? Are you curious and interested in electronic or software development? Then we look forward to receiving your application.

#### About Us

Network technology is becoming more and more relevant for audio transmission in professional applications such as concerts. Leading manufacturers are already relying on new open standards. We want to make this accessible to even more manufacturers by means of software that manufacturers integrate into their devices.

#### What makes JOYNED so special?

Product Innovation - Our focus is on true technical innovation that is already being used in our customers' products.

## Internship in the R&D of an audio enthusiastic tech startup

### Your tasks

Taking on your own tasks and project in the areas of electronic or software development.

You are a hungry, goal-oriented and action-oriented personality who wants to advance initiatives and thoughts.

You can complete tasks in a structured and conscientious manner.

You have very good knowledge of English.

### What we offer

1 - 6 month internship.

Openness to your ideas.

You will be supported by experienced developers.

Room to develop your own interests and work on your own project.

Attractive opportunities for advancement.

Nice work environment in the middle of the alps. We love it!

We offer you a gross monthly salary of €1,400.

Due to public funding this internship is specifically for female students.
